Welcome to **SkillScape Global**

Future Talent Forum: Malta

Building Future-Ready Workforce Systems for Every Learner & Worker

Nations worldwide have outlined ambitions for their workforces, education systems, and economies in the AI age. Now, the task is to translate that ambition and vision into practical pilots and plans that can withstand pressure, adapt to changing conditions, and create opportunity at scale.

During the **Future Talent Forum Malta – SkillScape Global** on September 16-17 you join global leaders from business, education, and government to separate signal from noise and define what successful transformation requires in practice.

The event builds on top of the success with the annual **SkillScape** event, created by Malta's **National Skills Council**.

Through keynotes, cross-sector panels, focused roundtable discussions, and facilitated 1-on-1 meetings, together we move from observation and prediction to action.

September 16

09:00 – Opening Address
09:30 – Keynotes, Panels & Roundtables
13:00 – Lunch
14:00 – Keynotes, Panels & Roundtables
17:00 – Closing Address & Network Reception

September 17

Agenda Highlights: The AI Jobs Market, Future Skills & Lifelong Learning

Global Outlook: Capital & Capabilities

The future of work will be shaped by national AI strategies, shifting capital flows, and the ability of institutions to turn technological capability into economic value. These sessions examine the global signals already redefining competitiveness, skills, investment, and opportunity.

- National AI Strategies & Mapping the "Human Stack"
- Capital Flows: A Business Case for the Future of Work
- The Law of Compounding Consequence

Future-Ready Workforce Systems

Future readiness requires more than new skills. It depends on workforce systems that can absorb change, redesign work, strengthen human agency, and connect employers, educators, governments, and citizens around a shared ambition for broad-based opportunity and progress.

- OECD: Building 21st Centuries Skills
- Citizenship: Who Gets to Build the Future?
- The Frontier Firm Model

From Insight to Action

Ideas matter when they can be implemented. Through workshops, youth perspectives, and practical models for hybrid intelligence and AI-integrated organizations, sessions focus on turning ambition into workable solutions that can deliver meaningful impact at scale.

- Voices From The Next Generation
- Hybrid Intelligence & Human Advantage
- The New Rules of Talent Leadership

Future of Education & Lifelong Learning

Learning can no longer be confined to one institution or stage of life. These sessions explore how schools, universities, employers, communities, and talent leaders can build more connected systems that develop human capability continuously across learning, work, and society.

- University Strategies in an AI Age
- The Future of Employer-Educator Partnerships
- Lifelong Learning Models

FUTURE
TALENT
COUNCIL

● Global Connections

Connect with and collaborate with peers from +30 countries

● Influential Content

Access world-class research, case studies, and data

● Interactive Format

The event blends keynotes, panels, roundtables, and networking

● Personalized Experience

Our team can recommend, sessions, connections & meetings
